

Potato Variety Identification and Ownership Table

Updated: 3-07-2017

Rating Key:

Characteristic	Options/Rating/Abbreviations	(new additions at bottom of main list)
Flower Color:	(corolla) lt=light, (m)=many), (sm) = small, (lg)=large; Examples: light lavender ; lt. Mauve ; red-violet ; medium violet ; reddish purple ; white ; pink ;	
Flesh Color:	(of tuber) Wh= white , Cr= cream ; , Y= yellow ; , B= blue , R= red , P= purple ;	
Skin Color:	(of tuber) Wh= smooth white , Ru= russet, Ru-Br= Brown Russet , P= purple , R= red , BrR= bright red ; lt=light (i.e., lt Russet), sm=smooth, dk=dark or deep (red); * red/ pink eyes ., *d-blue/purple eyes , (wx)=waxy	
Tuber Shape:	1 = Round, 5 = Very Long; (L-W Ratio Chart) f=flat, bk=blocky, cu= curved F=fingerling; cr=crescent, td=tear drop, r=rounded ends, sf=slightly flattened	
Vine Size:	1 = Very Small, 5 = Very Large, np=no pigment (reds); mz=metribuzin sensitivity; (e)=erect, (se)=semi erect, (t)=tall; (s)=spreading	
Maturity:	Very Early (<90 days.), Very Late (+120 days)	
Utilization:	Fr=Fresh, Pr=processing, C=Chip FF=French Fry, D=Dual fresh and processing, B=Boiling, Bk=baker, (ex)=export market; (nov)=novelty, g=gourmet	

NOTE: **public** = non-proprietary variety; **Public (heirloom)** = variety with no known or living breeder/owner (strains may vary);
? public = protection outside USA but no PVP application on record (as of 2-14-07);

- L. van Zanten** **L. van Zanten / TTI** = L. van Zanten Van Rijn - KWS B.V., Poeldijk, The Netherlands / **Tuberosum Technologies Inc.** (Canadian Agent) P.O. Box 271 Outlook, Saskatchewan, S0L 2N0, Canada, 306-867-9695 (or) Tuberosum Technologies Inc 780-484-9626 - 11720 170 Street NW, Edmonton, Alberta, Canada T5S 1J7

***2 Protection (nature of proprietary claim) in the US**

PVP = US Plant Variety Protection certificate issued or pending (see <http://www.ars-grin.gov/cgi-bin/npgs/html/pvplist.pl>)

PVP-A = certificate issued (as of April 2014)

PVP-B = Application pending (as of April 2014)

PVP-C = PVP application in progress (by variety owner) - not considered 'protected' until application actually made but generally material protected by a **MTA** (Material Transfer Agreement) between supplier and buyer of seed stock.

PVP-Ab= PVP application abandoned

MTA = Advanced Breeding line/New variety - Material Transfer agreement required for certified production (in the USA, generally PVP application in progress). For example of PVMI agreement see: [PVMI MTA](#) ,

[http://www.pvmi.org/Storage/Contracts/PVMI%20OSU%20Private%20Party%20Material%20Transfer%20Agreement%20\(Form\)%20\(OR\).pdf](http://www.pvmi.org/Storage/Contracts/PVMI%20OSU%20Private%20Party%20Material%20Transfer%20Agreement%20(Form)%20(OR).pdf)

(none) = Public Variety (no restrictions on production **IN THE UNITED STATES**); “none” simply means no known protection in the US (as of 4-9-14), protection in other countries may apply.

Special Notes & Abbreviations

NOTE: Provided for informational purposes only as noted in posted variety descriptions. See variety descriptions and/or contact variety owner for more specific information. No guarantees of performance implied.

GN = Golden nematode (see variety description for race)

LB = Late Blight

PLRV = Potato Leafroll Virus

PVA = Potato Virus A

Res.= Resistance show against
