1. Accept new Utah Sweetvetch Standards.

3. Amend perennial ryegrass crop standards by removing the statement “Linn does not have to be isolated from Oregon Annual Ryegrass” from footnote #1.

4. Accept the removal of all references in the OSCS Handbook regarding the use of growth regulators on grass species.

5. Accept amended crop standard for tetraploid ryegrasses to identify 95% as the minimum acceptable ploidy level in the Certified class and not change the current accepted level for Foundation (100%) and Registered (99%) classes of seed.

6. Accept amended field history in all ryegrass crop standards to include festulolium. Accept amended field history in festulolium to include intermediate ryegrass.

7. Accept an additional row in all ryegrass seed standards to state the minimum ploidy level for each class of certified seed. Add the following statement as a footnote to all ryegrass standards: “Ploidy Test: Is a test required to establish the incidence of diploid ryegrass in all tetraploid ryegrass varieties and assists in determining certification eligibility. A ploidy test should be requested at the time of sampling. Only varieties described as a tetraploid must be tested, those described as diploid or those of ‘unknown’ ploidy will not be tested.”

8. Modify the definition of “Ploidy Test” found on page 13 of the handbook, to indicate its use in species other than ryegrass.

9. Accept the addition of “Bromus riparius” to the Brome crop standards.

10. Accept amended seed standards for Bermudagrass to be 96% pure seed minimum, 4% inert maximum and 80% minimum germination.

11. Add definitions for “Molecular Tests” and “Allelic Discrimination Test” to the definitions on page 13 of the OSCS handbook.

12. Adopt an “Additional Certification Requirement” program based on the AOSCA model being developed, and move Small Grains Special Requirement K into that program.

13. Add a footnote to the Small Grains Seed Crop Inspection standards with regard to “phenotypic variants”. Add a footnote to the Small Grain Seed Standards with regard to “seed variants”.

14. Add the words “and/or its hybrids” after Jointed Goatgrass in the Small Grains standards, Special Requirements, item H.

15. Add Dog fennel to the prohibited weeds listed in footnote 5 of the Small Grains Seed Standards.
