Overall acreage totals will change as additional and late sign-ups come in and also where fields are withdrawn prior to inspection. Reviewing this year's response from seed growers, the acres reported for Oregon Certification inspection are as follows:

83% of the acreage has been signed up for inspection, 3% of the acreage is not to be certified this year, and 14% of the acreage has been removed. As of May 1, 2013, there are 12,062 acres yet to be accounted for and could be signed up for 2013 inspection.

Oregon certification is not complete until all record checks, field evaluations, and seed testing meets all standards and Oregon certification tags are issued and attached to individual bags of seed. Certification bulk shipping certificates can also be used with bulk or bag cereal grain.
