

<b>Border Removal For Grass Isolation (For fields 5 acres or larger)</b>		
<i>Generation ("class") of Inspected Crop</i>	<i>Distance from the contaminating pollen source</i>	<i>Width of Border Removal area<sup>1</sup> within the seed field</i>
Foundation	900 feet or more	0 feet
	600-899 feet	9 feet
	450-599 feet	15 feet
	Less than 450 feet	465 feet <sup>2</sup>
Registered	300 feet or more	0 feet
	225-299 feet	9 feet
	150-224 feet	15 feet
	Less than 150 feet	165 feet <sup>2</sup>
Certified	165 feet or more	0 feet
	105-164 feet	9 feet
	75-105 feet	15 feet
	Less than 75 feet	90 feet <sup>2</sup>
<sup>1</sup> The Border to be removed from the certified field shall be clearly marked with an adequate number and height of stakes (at least one every 300 feet and taller than the mature canopy height) so that the inspector can determine the distance. Re-inspections are required due to inadequate or improper staking. <sup>2</sup> The required Border Removal is measured from the edge of the contaminating pollen source.		

5. 25% Rule: Fields of the same variety but of differing generations ("classes") must be isolated by a distance of 25 percent of that otherwise required between varieties. This standard is applicable to all crops unless otherwise noted in the specific crop standard.
